450+ LeetCode problems solved • 80% cut in manual processing time (shipped feature) • 1st place, Hackforce 2.0 Hackathon

SUMMARY

Computer Science undergraduate (CGPA 9.03) targeting a **Software Development Engineer** Intern role, who ships production-style software end to end — authentication and RBAC, real-time systems on **Socket.io/WebRTC**, and **AI-integrated features** — rather than tutorial-scale demos. Backed by **450+ solved LeetCode problems**, a **first-place hackathon win**, and a track record of owning a feature from requirements through release.

EDUCATION

Geeta University

B.Tech, Computer Science & Engineering — CGPA 9.03

Sep 2023 – Jun 2027

EXPERIENCE

Full Stack Developer Intern | Codways Technologies, Noida

Jun 2026 – Jul 2026

- Engineered a **MERN-based hackathon-management platform** end to end — discovery, team formation via unique invitation codes, application tracking, and project submission — owning the feature from requirements through release.
- Reduced manual certificate-generation time by 80%** by automating the workflow with jsPDF, alongside JWT authentication, role-based access control, OTP email verification, and RESTful API integration.

Generative AI Intern | Skilligence EdTech, Rohini, New Delhi

Jun 2025 – Jul 2025

- Built an AI-powered mock-interview platform** spanning Technical, HR, and Cheat-Sheet modules to run dynamic, role-specific interview simulations.
- Combined proctored live coding with behavioral feedback in a single product** — a secure Monaco Editor environment with continuous proctoring, Recharts analytics, and an AI-driven English communication coach.

Trainee, Data Structures & Algorithms | Coding Blocks (Geeta University), Panipat

Jun 2024 – Jul 2024

- Solved 450+ problems on LeetCode in C++**, building consistent, interview-ready fluency in core data structures and algorithms.
- Practiced complexity-driven problem solving daily**, trading brute-force approaches for optimal ones as a habit rather than an exception.

PROJECTS

Growtix — AI Learning Hub | TypeScript, Supabase, Socket.io, Monaco Editor

Apr 2026

- Won 1st place at Hackforce 2.0 Hackathon** by building an intelligent educational hub with an AI mentor, personalized learning modules, and simulated interview prep.
- Built a LeetCode-style practice lab with live code execution, live tech-news feeds, and gamified daily tasks to drive consistent engagement.

AlgoYudh — Gamified DSA Learning Ecosystem | MERN Stack, Socket.io

Mar 2026

- Architected a real-time multiplayer full-stack gaming suite** — Code Runner, Code Race, and Git/GitHub challenges — enabling live peer-to-peer coding competitions.
- Designed live coding battles, debugging challenges, and algorithm visualizations to turn passive DSA study into interactive, competitive practice.

Chit Chat — Real-Time Messaging App | MERN Stack, Socket.io, WebRTC, Chakra UI

Dec 2025

- Built a JWT-authenticated app on Socket.io** for low-latency 1:1 and group messaging at scale.
- Integrated WebRTC video/voice calling and file sharing into a responsive, production-style interface.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, SQL, HTML, CSS

Frontend: React.js, Next.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, Socket.io, WebRTC, JWT Authentication

Databases: MongoDB, PostgreSQL, Supabase, Firebase

AI Tools: Gemini API, OpenAI API, Hugging Face, Prompt Engineering

Tools & DevOps: Git, GitHub, Vercel, Postman, Docker

ACHIEVEMENTS

- 1st Place Winner, Hackforce 2.0 — Geeta University Hackathon (Apr 2026).
- Spring School: Sports Technology, ML & Data Analytics — IIT Delhi (Mar 2026).
- 450+ problems solved on LeetCode (2024 – Present).
